

Fire Sprinkler International 2018

Exhibitors' Profiles

T: +39 0163 568811
E: rvacca@bocciolone.com
W: bocciolone.com

Bocciolone Antincendio S.p.A. is the Italian leader manufacturing company for Fire Fighting Equipment and Fire Protection Systems & Solutions, the most historical facility located in Vercelli area as from 1898.

The automatic FIREFLOW® WET-1000 Alarm Valve and FIREFLOW® DRY-1000 Dry Pipe Valve for Sprinkler Systems are the last new products, expression of company's technical experience and reliability, synonymous of the best quality Made in Italy, approved by EN 12259 European Standard.

The complete product range also include Fire Brigade Connections, Hose Reels & Cabinets, Lay-flat Hoses, Dry & Wet Pillar Hydrants, Digital Flowmeters, Fire Valves, Nozzles & Branchpipes, according to the main International Standards such as EN, DIN, BS, GOST, AFNOR.

As Italian leader manufacturing company, Bocciolone Antincendio S.p.A. yearly make investments in R&D of new products & solutions, by internal assembly and test in our prototype facility, with strong support of local Certification Laboratories. Bocciolone Antincendio S.p.A. is an international supplier for worldwide customers, organized by a dedicated Distribution Network, applied to different markets such as Residential, Commercial, Manufacturing, Logistic & Service Industry.

CLARKE FIRE

T: +44(0)1236 429946
E: rlivingston@clarkefire.com
W: clarkefire.com

Clarke Fire Protection Products sold its first diesel fire pump driver in 1964 as a regional distributor for GM Diesel. We began manufacturing our own UL-FM driver in 1980 and now market the largest line of diesel fire pump drivers in the world. To date more than 85,000 engines, bearing the Clarke name have been sold internationally. Clarke UK engines are produced in the UK for UK, EU, Mid East, Asian and African fire pump OEMs and packagers. These engines include LPCB, ApSAD, UL-FM and Non-Listed engines.

DUYAR VANA MAK. SAN. ve TIC. A.S.

T: +90 212 444 82 62
E: info@duyarvalve.com
W: duyarvalve.com

Duyar was founded in Istanbul 50 years ago. Today, Duyar is one of the leading valve manufacturing and marketing companies in Turkey. Our comprehensive products range includes cast iron and ductile iron gate valves, butterfly valves, ball valves, metal bellows sealed globe valves, check valves, strainers, expansion joint.

We also manufacture firefighting products for fire system installations. In particular, we manufacture domestic OS&Y and NRS gate valves, test and drain valves, butterfly valves with supervisory switch, wet alarm valves and sprinkler heads holding international certifications including UL, FM, CE and LPCB. We are rightly proud to export these products to 80 countries.

FM APPROVALS

T : +33 (0)450 655043
W : fmapprovals.com

FM Approvals offers worldwide certification and testing services for products related to commercial property risk mitigation. Recognized and respected across the globe, FM Approvals certification assures customers that a product or service has been objectively tested and conforms to rigorous property loss prevention standards. FM Approvals offers certification services to manufacturers of fire protection equipment, electrical equipment, fire and smoke detection, and signaling equipment, building materials, clean-room materials, hazardous location equipment and flood abatement products. The FM APPROVED mark, backed by scientific research and testing, helps set these products apart from others on the market. Architects, consulting engineers, plant managers, and product buyers use FM Approvals to help them make well-informed decisions about which products will best reduce property risk and help make businesses more resilient. FM Approvals also provides complimentary online resources dedicated to FM Approved property loss prevention products.

GLOBE SPRINKLER

T : +34 605 45 63 71
E : Rudy.Vautier@globesprinkler.com
W : globesprinkler.com

In 2014, Globe celebrated 100 years of continuous production of Globe Sprinklers and Valves, longer than any other sprinkler manufacturer. Charles Garrett, of the Garrett Sprinkler Company in Cincinnati, Ohio, began production of the first Globe sprinkler in 1914. The Globe Fire Sprinkler Corporation is still a family owned and operated, ISO-9001 certified manufacturer of sprinklers, valves, and accessories. Located in Standish, Michigan, Globe offers a complete range of USA-produced products for use in residential, commercial, storage, and special hazards applications.

Globe's portfolio of products is recognised by local, national and international testing and approving agencies such as Underwriter's Laboratories (UL), Factory Mutual (FM), and the Loss Prevention Council (LPC).

BlazeMaster® FIRE SPRINKLER SYSTEMS

T : +32.2.678.19.11
E : blazemaster.emena@lubrizol.com
W: blazemaster.com

Lubrizol, a Berkshire Hathaway company, is the inventor and world leader in chlorinated polyvinyl chloride (CPVC) resins and compounds for hot and cold water plumbing, fire sprinkler systems and industrial solutions for piping systems, storage tanks and scrubbers. Our high-performance technology found in FlowGuard® pipe and fittings, BlazeMaster® fire sprinkler systems and Corzan® industrial systems is also used in a variety of specialty applications that positively impact consumers.

BlazeMaster® fire sprinkler systems meet and exceed global performance and manufacturing standards for CPVC fire sprinkler systems - making it the most specified non-metallic option in the world.

BlazeMaster® fire sprinkler systems are:

- Specially engineered for fire sprinkler applications
- Listed for use in light hazard applications as defined by NFPA 13/13R/13D
- Immune to the effects of pitting and corrosion
- Excellent flame and smoke characteristics
- Lower installation costs when compared to metallic systems

NORDIC SPRINKLER

T : +46 8 590 90 560
E : benny@nordicsprinkler.se
W: nordicsprinkler.se

Nordic Sprinkler is the specialist for your sprinkler solutions!

Our business idea is to promote a complete range of sprinkler products for the sprinkler market in the Nordic region. We have been trusted to bring market quality products from trusted suppliers around the globe.

We certify our products with relevant sprinkler approvals and ensure that they comply with applicable environmental requirements through the Building Materials Assessment. In addition to large stock and a big warehouse, we also have our own trucks that ensure that promised deliveries are met.

We are constantly developing our own new products under the NordicFlow® brand for you, as a customer, to get high quality alternatives to the best economy possible.

Education - Nordic Sprinkler offers many courses and courses in eg. Sprinkler, foam, and materials related to the different standards, as well as the latest technology in water mist and other extinguishing systems. We also offer tailor-made courses according to your company's needs. Contact us for more information about this.

Prefabricated sprinkler systems - We can also offer Prefabricated solutions to your Sprinkler project, visit <http://www.nordicsprinkler.se/prefabpartner/> for more info.

POTTER ELECTRIC SIGNAL COMPANY, LLC

T : 800-325-3936
E : sales@pottersignal.com
W: pottersignal.com

Established in 1898, Potter Electric Signal Company produces a wide array of products, including fire sprinkler monitoring systems, nitrogen generators, corrosion monitoring/testing, electronic fire systems, vault and safe security systems, and boiler/chiller and industrial control products. At Potter, not only do we supply our customers with products that provide real world solutions for their unique needs, we strive to provide them unequalled service and technical support. Every employee at Potter is committed to provide the very best product and service available for the protection of life and property. Potter is THE Symbol of Protection.

T: +44 (0)1733 847510
E: rapidrop@rapidrop.com
W: rapidrop.com

Rapidrop Global Ltd is a British sprinkler head manufacturer and supplier of fire protection equipment.

Our range includes products which have internationally recognised approvals and listings from FM/UL/VDS and LPCB, as well as local approvals where required. UK manufactured sprinkler heads and sprinkler equipment including the market leading Rapidrop flexible sprinkler connections, alarm control valves, butterfly, gate and check valves, deluge equipment, grooved couplings and fittings, pump room equipment and Wet & Dry Risers are all part of our comprehensive range of products.

Rapidrop have supplied and currently supply sprinklers and fire suppression systems to projects worldwide, serving; residential, commercial, warehouses, manufacturing, retail, shopping centres, schools, hospitals, airports, entertainment and sporting venues.

As part of Rapidrop's commitments to fire safety and protecting lives, we invest in research and development, which we conduct in our own state of the art testing facility, one of its kind in the UK. Dedicated to innovation and reinforcing our position in the Fire protection market Rapidrop is focused on bringing new products to the market that makes our customers lives easier, safer and better.

RELIABLE SPRINKLER UK

T: +44 (0) 1342 316 800
E: info@reliablesprinkler.com
W: reliablesprinkler.com

Reliable Automatic Sprinkler Co., Inc. is a family run, international company that is one of the world's largest producers of automatic fire sprinklers and sprinkler system control equipment. The company was founded in 1920 and is continuing to expand and grow. Reliable now have a 300,000 square foot facility in South Carolina and sales offices located around the world. Reliable's aims are to be the leading worldwide manufacturer of innovative, quality-oriented fire sprinklers and systems devices, secondly, to be a leading supplier of fire sprinkler system components; and to be the leader in providing the highest level of operational excellence in customer service. Reliable produces a vast range of sprinklers featuring solder types and frangible bulbs. They also produce a broad range of valves including alarm, dry pipe, deluge, preaction, and check valves that control water flow to sprinkler systems and actuate alarm signalling. Reliable products are listed and approved by various fire protection product approval laboratories and organisations. Reliable is also pursuing a Green Policy and is committed to protecting our environment by developing products that use recycled materials that reduce the use of natural resources.

RISE RESEARCH INSTITUTES OF SWEDEN – SAFETY

T: +46 105 16 56 86
E: fredrik.g.rosen@ri.se
W: ri.se

RISE which is fully owned by the Swedish government are located with subsidiaries in both Sweden and Norway. In total, RISE employs 2300 employees, with approximately 135 employees focused on fire protection.

RISE are active in fire research, fire safety engineering (FSE), hazard assessments, risk analysis, testing, certification, support to national and international legislation and certification., for infrastructure, buildings, ships, vehicles, offshore, heritage buildings, etc. The expertise of RISE includes theoretical analyses of the growth of fires, the spread of smoke, calculations of temperatures in structures exposed to fire, fire-fighting and risk management.

RISE can offer small and largescale testing of fire-fighting systems, agents and equipment, including sprinkler and water mist fire protection systems. The behavior of materials and products in fires can be investigated. The results can be used for CE-marking, type approval, P-marking and other types of certification in Sweden and in many other countries.

RISE has an extensive network of contacts for example in CEN (European standardization), ISO (international standardisation), EGOLF (European official laboratories), FORUM of Fire Research Directors, SFPE (Society of Fire Protection Engineers) and the Fire Sector Group of Notified Bodies. RISE collaborates with universities, organizations and industry groups to provide additional expertise.

RISE activities are presented in the magazine Brandposten that is published twice a year in Swedish/Norwegian and English.

Fire Fighting Foam concentrates developed and produced by Dr.Sthamer Hamburg are the choice for a large number of clients in different industries worldwide. Founded in 1886 the family owned business Dr.Sthamer Hamburg specialises in the development and production of state of the art fire fighting foam concentrates since the 1920s. The VdS certified production plant as well as its fire fighting foam products comply with the latest German environmental regulations. Dr.STHAMER HAMBURG holds well known and internationally accepted listings and certifications such as UL 162, EN 1568, VdS, FM, ICAO, LASTFire, GOST, IMO and more.

SZMH GROUP – SYSTEM VIROTEC

T : +49 511 6700-0
E : system.virotec@szmh-group.com
W : salzgitter-mannesmann-stahlhandel.com/products/pipe_joining_elements/

System VIROTEC® is a well arranged product array of pipe joint elements for use in pipeline construction, particularly suitable for the manufacture of sprinkler systems (automatic, stationary fire extinguishing equipment). These products are efficient and innovative and feature:

- easy and quick assembly
- high degree of functional safety
- comprehensive range
- attractive design and high-quality workmanship

Our component parts are tested and acknowledged at VdS Schadenverhütung in Cologne and FM (Factory Mutual) in USA.

All products are developed, manufactured and distributed in conformance with a recognized QA system as per DIN EN ISO 9001. Some products are protected by international patents and/or patented designs.

Our qualified and efficient team offers the best possible consultation to customers and ensures quick and smooth processing of the sales orders.

With our extensive range of pipes and pre-fabricated pipes, we are a one stop shop for all products relating to your pipeline system all over the world.

TORNATECH EUROPE SPRL.

T : + 32 (0) 10 84 40 01
E : danielg@tornatech.com
W : tornatech.com

Tornatech specialises in the conception and manufacturing of fire pump controllers in accordance with the NFPA 20 standard, listed with UL and approved by FM. In addition, we have developed controllers that meet various local standards and approvals such as A2P (France) and LPCB (UK), to name a few. Our products are installed globally in over 80 countries. With manufacturing capabilities in Canada, Belgium and U.A.E, a sales office in Singapore as well as sales representatives in the U.S.A and Latin America, we are truly a worldwide reference in Fire Pump Controllers.

T: +44(0)161 455 4400
E: hlouw@tyco-bspd.com
W: tfppemea.com

TYCO sprinklers and fire system components form part of Johnson Controls International – a global leader in building products and technology platforms with a deep expertise across multiple industries. The various end-markets served, includes large institutions, commercial buildings, retail, industrial, small business and residential. Whatever the water-based fire suppression system required, TYCO has an extensive product portfolio which includes standard spray, extended coverage, storage, residential, dry, and special sprinklers, as well as sprinkler accessories, nozzles and nozzle accessories; wet system valves and water motor alarms, dry system valves, quick opening and air maintenance devices, deluge system valves and accessories, pre-action systems, and general purpose and solenoid valves. It also provides grooved products; CPVC fire sprinkler pipes and fittings; water-mist fire protection systems; foam sprinkler equipment; sprinkler design software products; and performance based design and design services.

VDS SCHADENVERHÜTUNG GMBH

T: +49 (0) 221 7766 6417
E: Fscharr@vds.de.net
W: vds.de

Proven Safety: Rely on Europe's No. 1 Institute for Fire Protection. Sales boost worldwide – with the full reliability of extinguishing systems and services clearly documented:

- VdS Guidelines: Profiting from far more than 100 years of experience, VdS sets international standards with practical guidelines for the planning and installation of safety technologies.
- VdS-approved Products: The most extensive sector survey in Europe (WIK Enquete) has shown for many years in a row: top buying criteria for professionals is the VdS Quality Certificate. Accepted by authorities worldwide – and also applicable to EN, NFPA, BS and further standards.
- VdS-approved Installers: Highest quality proven at first sight – clearly documenting full reliability of equipment as well as performance.
- VdS Inspections: The reliance of fire extinguishing systems has been tested by VdS ever since they were first introduced in Europe. For all core detection and extinguishing technologies, VdS can combine insurance and building law inspections, saving you time and money.

With VdS, you will find any faults in the complex systems immediately – and not while fire is raging.

VICTAULIC BE

T: +32 9 381 15 00
E: viceuro@victaulic.com
W: victaulic.com

Victaulic® innovation began in 1919 with the first grooved-end mechanical pipe joining technology. In 1952, Victaulic released the first approved coupling for fire protection services. Today, Victaulic technology includes a complete offering of sprinklers, couplings, fittings, valves, accessories and tools to meet the needs of any fire protection application. One of Victaulic's revolutionising innovations are the FireLock™ Installation-Ready™ fittings. These fittings reduce the number of parts on a jobsite, minimizing the jobsite inventory and material handling by reducing the number of times the sprinkler fitter needs to go up and down the lift or ladder. In addition to less parts, the Installation-Ready fittings have no loose parts to drop or lose minimizing jobsite inventory and material handling on-site, therefore reducing the risk of personnel injury. The outcome is consistently faster pipe joints, and up to 75% less jobsite inventory, allowing contractors to optimize crew size and to better manage their labor risks. Other Victaulic products that made an impact on the market include the FireLock NXT™ devices, the VicFlex™ Flexible Sprinkler Fittings and the Installation-Ready™ coupling Style 009N. All these products guarantee a fast and secure installation and help to reduce installation time and cost.

T: +352 58 37 37 1
 E: vikinglux@viking-emea.com
 W: viking-emea.com

Viking is a dependable partner in fire protection with almost 100 years of experience and is part of the Minimax Viking Group employing around 8,000 people and boasting an annual turnover in the region of €1.4bn. In addition to the high quality fire protection technologies from Minimax Viking's research, development and manufacturing facilities in Europe, USA and Asia, Viking supplies complimentary quality products from other manufacturers and partners. Installers, specifiers and users of fire protection systems are therefore able to access a full range of components for water, foam, detection and gas-based fire suppression systems. Excellent technical support and high levels of product availability complete the market leading service offering.

VSH INTEGRATED PIPING SYSTEMS

T: +31 (0)35 68 84 330
 E: info@vsh.nl
 W: vsh.eu

VSH from the Netherlands is the number one specialist for integrated piping systems. We provide our customers with high quality, innovative integrated piping systems for gases and liquids together with their respective fittings. Our systems are used in residential and commercial construction, industry, fire safety and shipbuilding. VSH Integrated Piping Systems are known for their high, consistent quality combined with quick and simple installation and maintenance.

All VSH systems are digitally prepared (BIM ready, CAD and data exchange) and technical specifications are easy to set. Furthermore, our systems are supported by VSH Engineering Services, which assembles the best integrated piping system for every possible application.

VSH is a strong international player that focuses exclusively on Integrated Piping Systems. VSH offers the widest range of reliable systems in the business: compression, groove, press and push systems in thick- or thin-walled metal or plastic. The product range can be combined with exactly the right fitting technology to ensure that you receive the best possible system for your application.

VSH has its own international knowledge and development centre, state of the art production facilities and efficient distribution centres. We also have a fully customer-oriented sales and service organisation with proven experts always available to assist you. This ensures you will receive professional advice from the very start of your project, as well as customised integrated solutions, seamless availability and reliable support both during and after delivery.

VSH assures a safe and above all successful future - find out more about VSH now.
