

Call for Papers

Paris Marriott Rive Gauche Hotel & Conference Center

22-23 April 2026

Hosted by the European Fire Sprinkler Network, [Fire Sprinkler International 2026](#) is the premier event in the sprinkler calendar and the largest conference in Europe dedicated to sprinkler and water mist technology. 460 delegates from around the world came to Salzburg this year and we are expecting a strong attendance next year in Paris. As always there will be a supporting exhibition, and a social event on 22nd April.

We are now calling for abstracts for papers to be presented at the conference. Abstracts should be submitted to brinson@eurosprinkler.org by **12 December 2025**. They should include the title of the paper, a paragraph or two to explain what will be covered, the name(s) of those who will present it, their company or organisation name and their contact details.

The conference programme will explore the following themes:

- New sprinkler/water mist/foam system technology
- Developments in sprinkler/water mist/foam standards
- Solutions for new fire protection challenges
- Environmental and sustainability considerations
- Fire engineered solutions with sprinklers
- End user input
- Research into the need for and benefits of sprinklers
- New regulatory requirements or incentives to fit sprinklers
- Remote services for sprinkler systems

We will also accept commercial introductions of a new product, with more information on the stand. These presentations may be shorter.

Speakers receive complimentary conference registration. We are not generally able to reimburse travel and accommodation costs for speakers.

Notifications of acceptance will be sent by **16 January 2026**. Papers and presentations must be submitted by **6 March 2026**.
