

Call for Papers RAI Amsterdam, 31 May-1 June 2023

Hosted by the European Fire Sprinkler Network, [Fire Sprinkler International 2023](#) is the premier event in the sprinkler calendar and the largest conference in Europe dedicated to sprinkler and water mist technology. Last year in London 300 delegates from around the world attended and we are expecting even more delegates next year in Amsterdam. As always there will be a supporting exhibition, as well as a social event on 31st May.

We are now calling for abstracts for papers to be presented at the conference. Abstracts should be submitted to brinson@eurosprinkler.org by **16 December 2022**. They should include the title of the paper, a paragraph or two to explain what will be covered, the name(s) of those who will present it, their company or organisation name and their contact details.

The conference programme will explore the following themes:

- Solutions for new fire protection challenges
- Fire engineered solutions with sprinklers
- New sprinkler/water mist/foam system technology
- Developments in sprinkler/water mist standards
- Quality assurance
- Environmental and sustainability considerations
- Training
- Remote services for sprinkler systems

We also invite abstracts on new regulatory incentives or requirements to install sprinklers in buildings, and will consider abstracts on other themes.

Please note that, in common with most such events, the organisers are not able to reimburse speaker's travelling and accommodation costs but all selected speakers will be provided with a complimentary conference registration.

Notifications of acceptance will be sent by **20 January 2023**. Papers and presentations must be submitted by **5 May 2023**.
