

Practical considerations around suppression systems in cultural heritage buildings

Introducing

- My name is Rene van Essen
- I work as a Project Manager / Partner at SBM Bouw- en Vastgoedmanagers b.v
- The Municipality of Deventer decided 7 years ago to outsource the Operational/Tactical management and Maintenance of its real estate to a market party
- SBM won the tender for this long-term contract and I fulfill the role of Project/Contract Manager.
- We manage and maintain approximately 280 objects, including 80 objects that belong to the so-called. Core property, 12 of which are cultural heritage.
