

How can modern sensor technology improve reliability and add value to the end user?

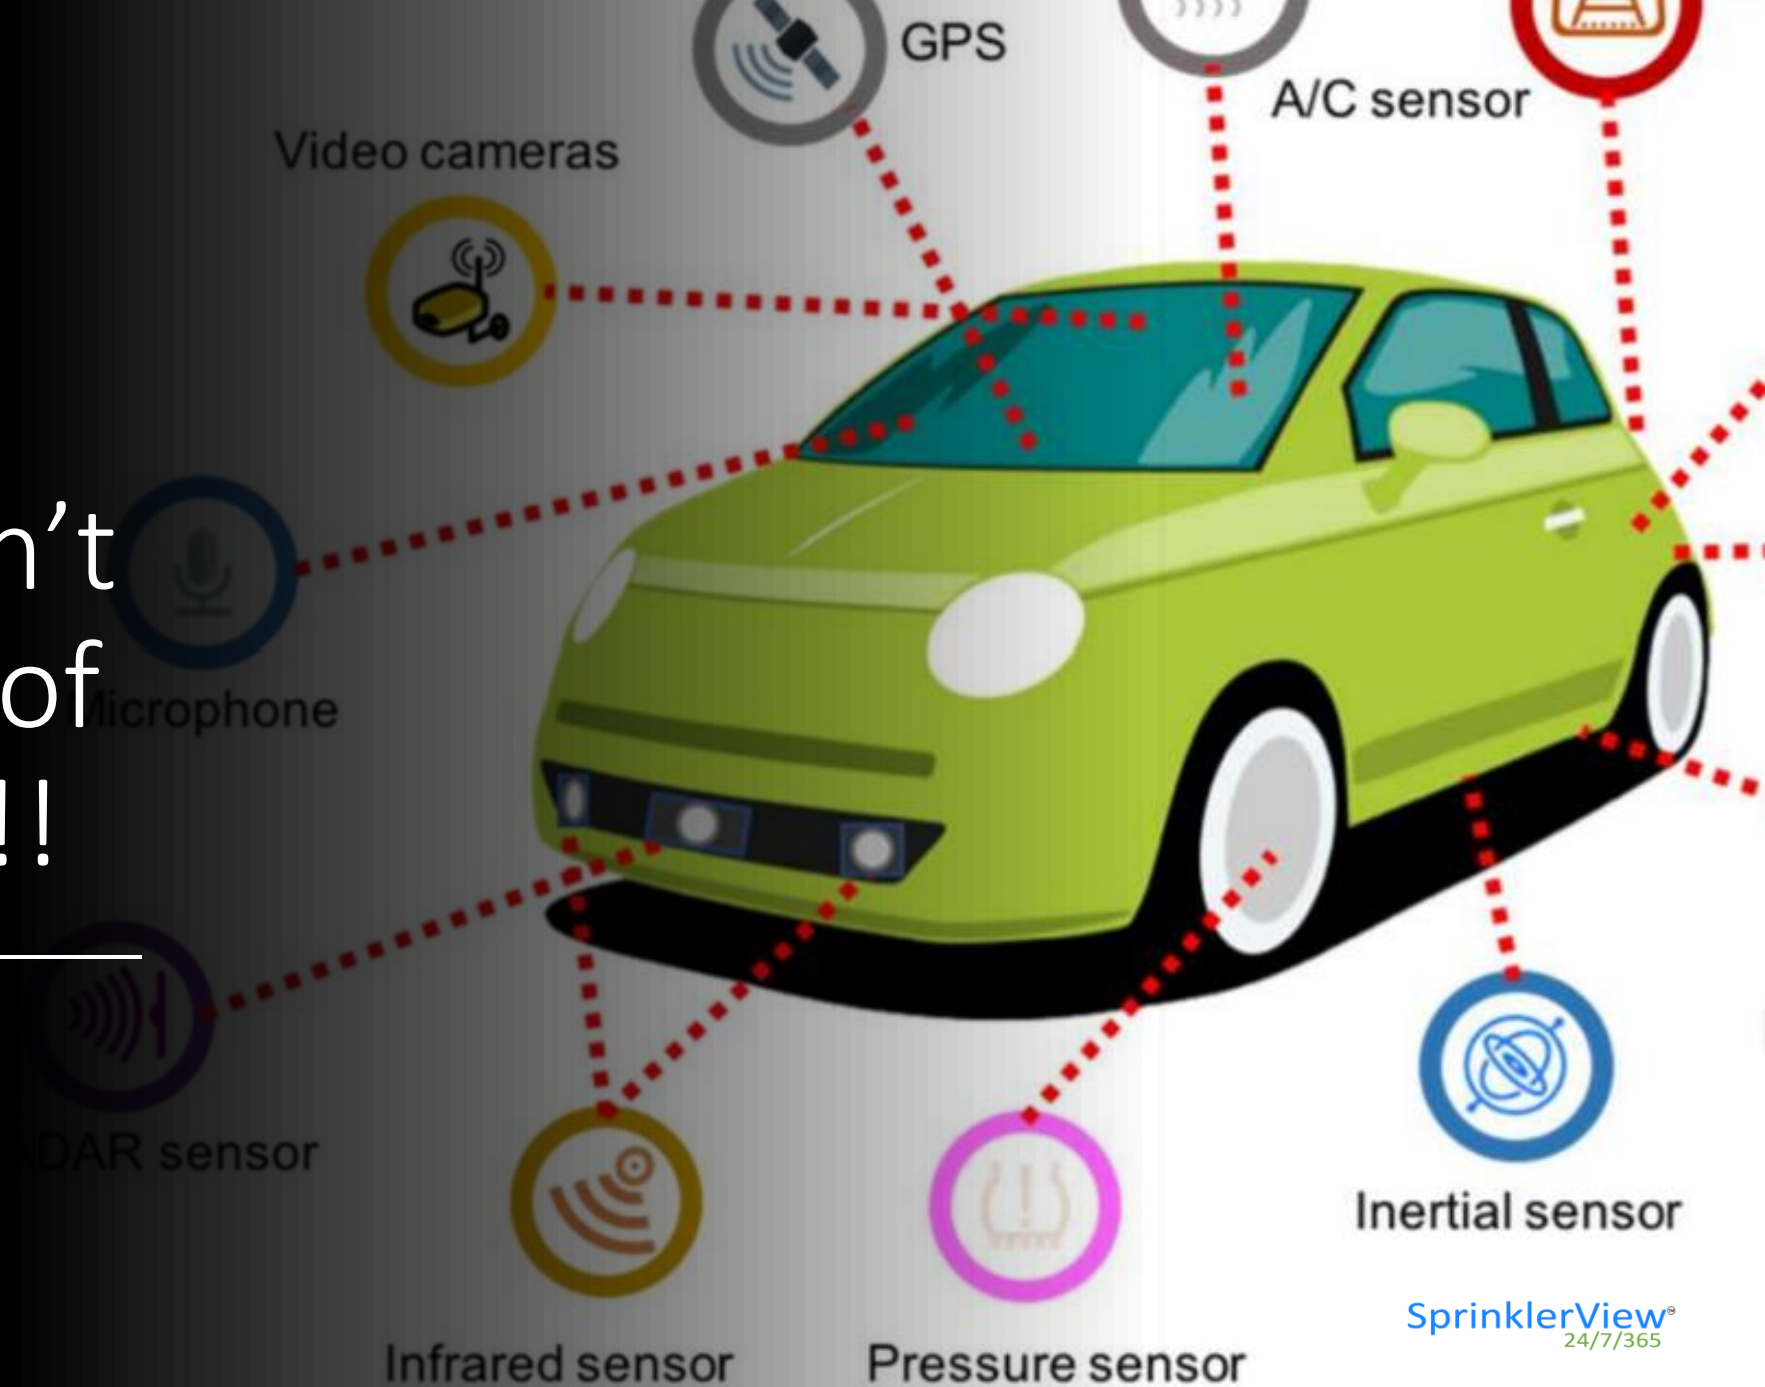

- How can connectivity improve our daily work?
- How can connected devices secure efficiency and security?

Physical presence, ears
and eyes are always
needed in the basement.

Nooo, we don't use this kind of technology!!!!

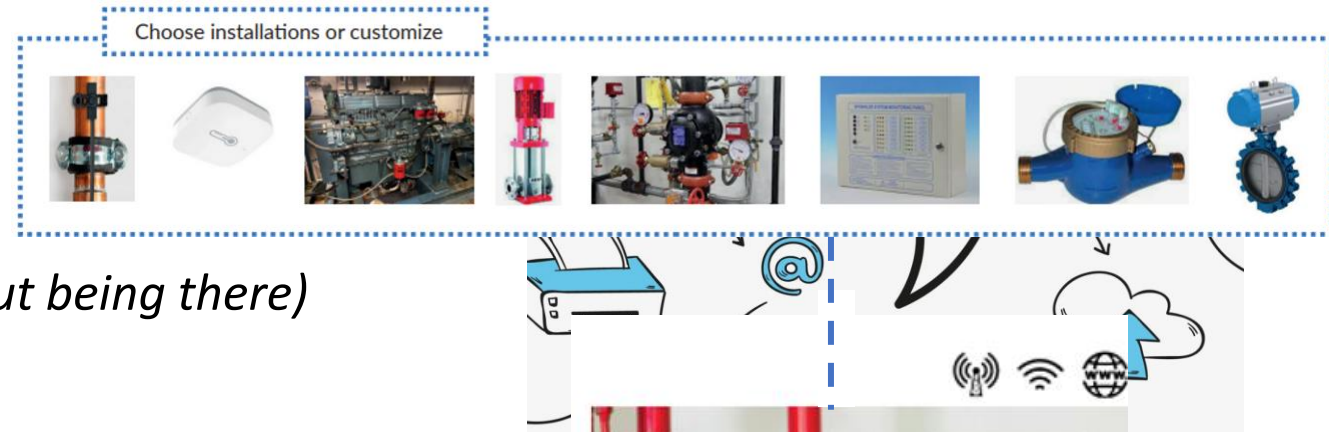

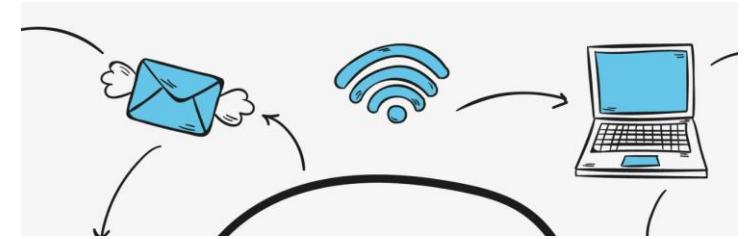

Connected device fact list

(short – but still the world's most borrowing slide)

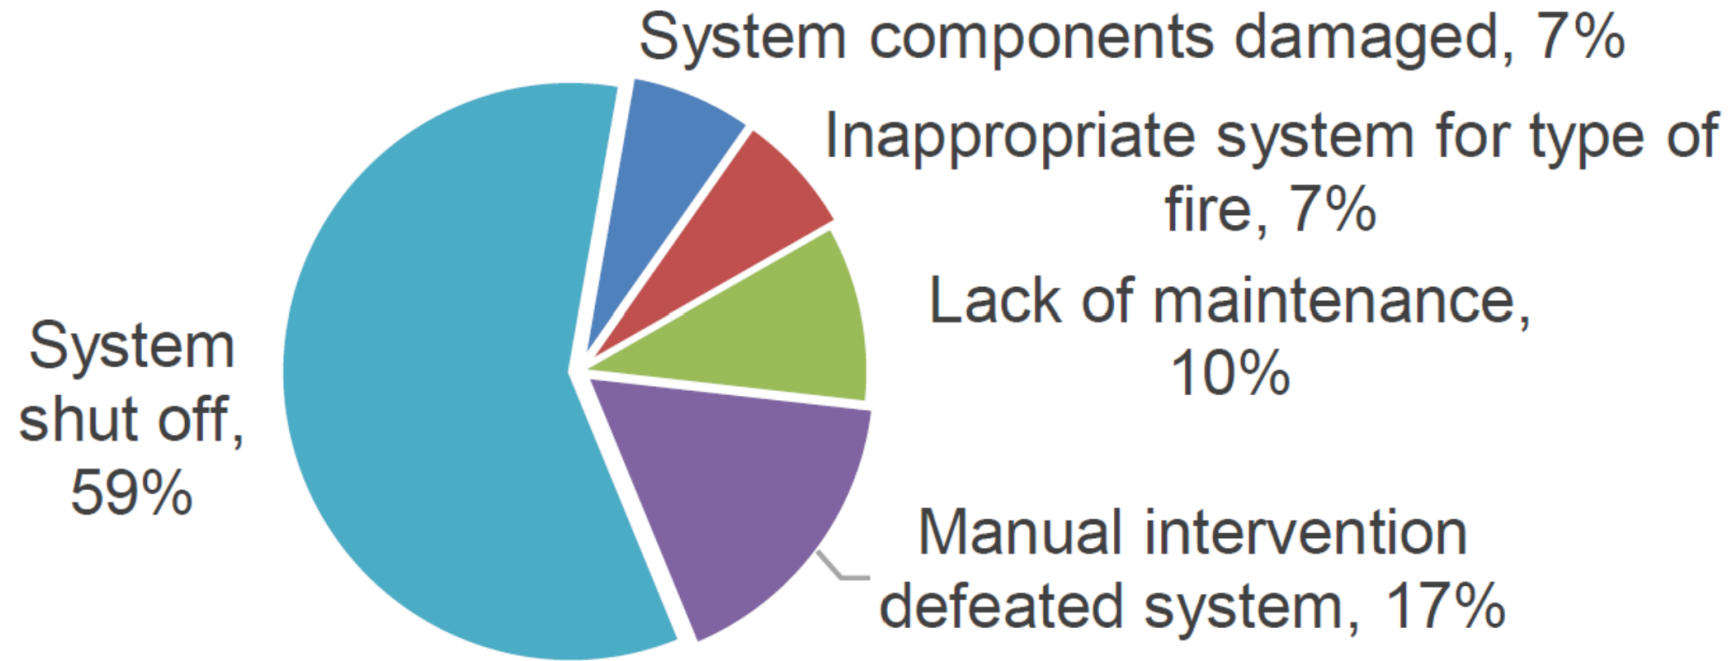

- Connect everyday objects
- Enables companies to automate processes
- Optimize labor costs
- *Improves service delivery*
- *Offering overview & transparency*
- *Optimize human effort (24/7 overview without being there)*
- *Save time (no need to rush in everyday)*

Connected to the fire sprinkler system:

- Increase customer engagement & loyalty
- Boost employee productivity
- Optimize business operations
- Be able to secure vital parts to work when necessary
- 24/7 monitoring of what we don't see, when not being there
- The health of the “pump room” at your fingertips
- Foresee eventual damage on equipment

Why did the fire sprinkler system not work when fire occurred!

SprinklerViewTM

24/7/365

Installers is our Resellers – we grow our partners while they grow us

Intelligent 24/7 real-time remote fire sprinkler monitoring system
