

Call for Papers Salzburg Congress, 2-3 April 2025

Hosted by the European Fire Sprinkler Network, [Fire Sprinkler International 2025](#) is the premier event in the sprinkler calendar and the largest conference in Europe dedicated to sprinkler and water mist technology. This year in Dublin 415 delegates from around the world attended and we are expecting a strong attendance next year in Salzburg. As always there will be a supporting exhibition, as well as a social event on 3rd April.

We are now calling for abstracts for papers to be presented at the conference. Abstracts should be submitted to brinson@eurosprinkler.org by **13 December 2024**. They should include the title of the paper, a paragraph or two to explain what will be covered, the name(s) of those who will present it, their company or organisation name and their contact details.

The conference programme will explore the following themes:

- New sprinkler/water mist/foam system technology
- Solutions for new fire protection challenges (e.g. automatic storage, products powered by Li-ion batteries or hydrogen)
- Fire engineered solutions with sprinklers
- End user input
- Research into the need for and benefits of sprinklers
- New regulatory requirements or incentives to fit sprinklers
- Environmental and sustainability considerations
- Developments in sprinkler/water mist/foam standards
- Training
- Remote services for sprinkler systems

All selected speakers will be provided with a complimentary conference registration. Please note that the organisers are not generally able to reimburse travel and accommodation costs for speakers.

Notifications of acceptance will be sent by **17 January 2025**. Papers and presentations must be submitted by **7 March 2025**.
